INDEX TO VOLUME 144

Alphabetical Table of Contents of Authors

ABRAMS, PETER A. Should prey overestimate the risk of predation? 317

ADLER, FREDERICK R., and RICHARD KARBAN. Defended fortresses or moving targets? another model of inducible defenses inspired by military metaphors, 813

ANDERSON, GREGORY J., and G. LEDYARD STEBBINS. Nothing transferred, nothing gained: dioecy and gametophytic self-incompatibility continued, 688

ANTIA, RUSTOM, BRUCE R. LEVIN, and ROBERT M. MAY. Within-host population dynamics and the evolution and maintenance of microparasite virulence, 457

ARNOLD, STEVAN J. Is there a unifying concept of sexual selection that applies to both plants and animals? S1

———. Bateman's principles and the measurement of sexual selection in plants and animals, S126

ARNQVIST, GÖRAN. The cost of male secondary sexual traits: developmental constraints during ontogeny in a sexually dimorphic water strider, 119

ASHMAN, TIA-LYNN. A dynamic perspective on the physiological cost of reproduction in plants, 300

BARCLAY, ROBERT M. R. Constraints on reproduction by flying vertebrates: energy and calcium, 1021

BASOLO, ALEXANDRA L. The dynamics of Fisherian sex-ratio evolution: theoretical and experimental investigations, 473

BENNETT, A. T. D., I. C. CUTHILL, and K. J. NORRIS. Sexual selection and the mismeasure of color, 848

BERTNESS, MARK D., and SALLY D. HACKER. Physical stress and positive associations among marsh plants, 363

BOLKER, JESSICA A. See ANDRES COLLAZO

BURKE, TERRY. See IAN P. F. OWENS

BURLEY, NANCY TYLER. See DONALD K. PRICE

CAREY, JAMES R. See MARC TATAR

CASPER, BRENDA B. See RICHARD A. NIESENBAUM

CHARLESWORTH, BRIAN. The genetics of adaptation: lessons from mimicry, 839

CLARK, COLIN W., and REUVEN DUKAS. Balancing foraging and antipredator demands: an advantage of sociality, 542

CLOBERT, JEAN. See GABRIELE SORCI

COLLAZO, ANDRES, JESSICA A. BOLKER, and RAY KELLER. A phylogenetic perspective on teleost gastrulation, 133

COLWELL, ROBERT K., and GEORGE C. HURTT. Nonbiological gradients in species richness and a spurious Rapoport effect, 570

COUVET, DENIS. See ISABELLE OLIVIERI

CURTSINGER, JAMES W., PHILIP M. SERVICE, and TIMOTHY PROUT. Antagonistic pleiotropy, reversal of dominance, and genetic polymorphism, 210

CUTHILL, I. C. See A. T. D. BENNETT

DAJOZ, ISABELLE. See IRÈNE TILL-BOTTRAUD

DEANGELIS, DONALD L. See MICHAEL A. HUSTON

DENG, HONG-WEN. See MICHAEL LYNCH

DE VISSER, J. A. G. M., A. TER MAAT, and C. ZONNEVELD. Energy budgets and reproductive allocation in the simultaneous hermaphrodite pond snail, *Lymnaea stagnalis* (L.): a trade-off between male and female function, 861

DOMBROVSKY, Y., and N. PERRIN. On adaptive search and optimal stopping in sequential mate choice, 355

DUKAS, REUVEN. See COLIN W. CLARK

EGGERT, ANNE-KATRIN, and SCOTT K. SAKALUK. Fluctuating asymmetry and variation in the size of courtship food gifts in decorated crickets, 708

FAIRBAIRN, DAPHNE J., and RICHARD F. PREZIOSI. Sexual selection and the evolution of allometry for sexual size dimorphism in the water strider, *Aquarius remigis,* 101

GODFRAY, H. C. J. See P. ROHANI
GOLDSTEIN, DAVID B. Deleterious mutations and the evolution of male haploidy, 176
GÖRANSSON, GÖRGEN. See TORBJÖRN VON SCHANTZ
GOTELLI, NICHOLAS J. See CHRISTOPHER M. TAYLOR
GOUYON, PIERRE-HENRI. See IRÈNE TILL-BOTTRAUD
GRAHN, MATS. See TORBJÖRN VON SCHANTZ
GROVER, JAMES. See ROBERT D. HOLT
GURNEY, W. S. C. See G. D. RUXTON

HACKER, SALLY D. See MARK D. BERTNESS
HANSKI, ILKKA, HEIKKI HENTTONEN, and LENNART HANSSON. Temporal variability and geographical patterns in the population density of microtine rodents: a reply to Xia and Boonstra, 329
HANSSON, LENNART. See ILKKA HANSKI
HARVEY, PAUL H. See ANDY J. LETCHER
HASSELL, M. P. See P. ROHANI
HAYDON, DANIEL. Pivotal assumptions determining the relationship between stability and complexity: an analytical synthesis of the stability-complexity debate, 14
HENTTONEN, HEIKKI. See ILKKA HANSKI
HÖGLUND, JACOB, and BIRGITTA SILLÉN-TULLBERG. Does lekking promote the evolution of male-biased size dimorphism in birds? on the use of comparative approaches, 881
HOLSINGER, KENT E., and JAMES D. THOMSON. Pollen discounting in *Erythronium grandiflorum:* mass-action estimates from pollen transfer dynamics, 799
HOLT, ROBERT D., JAMES GROVER, and DAVID TILMAN. Simple rules for interspecific dominance in systems with exploitative and apparent competition, 741
HORI, MICHIO. See SATOSHI TAKAHASHI
HOUSTON, ALASDAIR I. See JOHN M. MCNAMARA
HURTT, GEORGE C. See ROBERT K. COLWELL
HUSTON, MICHAEL A., and DONALD L. DEANGELIS. Competition and coexistence: the effects of resource transport and supply rates, 954

IRWIN, REBECCA E. The evolution of plumage dichromatism in the New World blackbirds: social selection on female brightness? 890

KARBAN, RICHARD. See FREDERICK R. ADLER
KAROLY, KEITH. Dioecy and gametophytic self-incompatibility: reproductive efficiency revisited, 677
KAWECKI, TADEUSZ J. Accumulation of deleterious mutations and the evolutionary cost of being a generalist, 833
KELLER, RAY. See ANDRES COLLAZO
KIM, SUNG B. See ARMAND M. LEROI

LENSKI, RICHARD E. See FARIDA VASI
LEROI, ARMAND M., SUNG B. KIM, and MICHAEL R. ROSE. The evolution of phenotypic life-history trade-offs: an experimental study using *Drosophila melanogaster,* 661
LETCHER, ANDY J., and PAUL H. HARVEY. Variation in geographical range size among mammals of the Palearctic, 30
LEVIN, BRUCE R. See RUSTOM ANTIA
LYNCH, MICHAEL, and HONG-WEN DENG. Genetic slippage in response to sex, 242

MARTINEZ, NEO D. Scale-dependent constraints on food-web structure, 935
MARTINS, EMÍLIA P. Estimating the rate of phenotypic evolution from comparative data, 193
MASSOT, MANUEL. See GABRIELE SORCI
MATHEWS, J. N. A. The benefits of overcompensation and herbivory: the difference between coping with herbivores and liking them, 528
MAY, ROBERT M. See RUSTOM ANTIA
MCCANN, KEVIN, and PETER YODZIS. Nonlinear dynamics and population disappearances, 873
MCCAULEY, DAVID E. Intrademic group selection imposed by a parasitoid-host interaction, 1

McNab, Brian K. Energy conservation and the evolution of flightlessness in birds, 628
———. Resource use and the survival of land and freshwater vertebrates on oceanic islands, 643
McNamara, John M., and Alasdair I. Houston. The effect of a change in foraging options on intake rate and predation rate, 978
Mills, L. Scott, and Peter E. Smouse. Demographic consequences of inbreeding in remnant populations, 412
Morgan, Martin T. Models of sexual selection in hermaphrodites, especially plants, S100
Motro, Uzi. Evolutionary and continuous stability in asymmetric games with continuous strategy sets: the parental investment conflict as an example, 229

Nagelkerke, Cornelis J. Simultaneous optimization of egg distribution and sex allocation in a patch-structured population, 262
Niesenbaum, Richard A., and Brenda B. Casper. Pollen tube numbers and selective fruit maturation in *Lindera benzoin*, 184
Norris, K. J. See A. T. D. Bennett

Olivieri, Isabelle, Denis Couvet, and Montgomery Slatkin. Allocation of reproductive effort in perennial plants under pollen limitation, 373
Owens, Ian P. F., Terry Burke, and Desmond B. A. Thompson. Extraordinary sex roles in the Eurasian dotterel: female mating arenas, female-female competition, and female mate choice, 76

Palmer, Michael W., and Peter S. White. Scale dependence and the species-area relationship, 717
Perrin, N. See Y. Dombrovsky
Preziosi, Richard F. See Daphne J. Fairbairn
Price, Donald K., and Nancy Tyler Burley. Constraints on the evolution of attractive traits: selection in male and female zebra finches, 908
Prout, Timothy. See James W. Curtsinger

Queller, David C. Male-female conflict and parent-offspring conflict, S84

Rees, Mark. Delayed germination of seeds: a look at the effects of adult longevity, the timing of reproduction, and population age/stage structure, 43
Robinson, Beren W., and David Sloan Wilson. Character release and displacement in fishes: a neglected literature, 596
Roff, Derek A. Habitat persistence and the evolution of wing dimorphism in insects, 772
Rohani, P., H. C. J. Godfray, and M. P. Hassell. Aggregation and the dynamics of host-parasitoid systems: a discrete-generation model with within-generation redistribution, 491
Rose, Michael R. See Armand M. Leroi
Ruxton, G. D., and W. S. C. Gurney. Deriving the functional response without assuming homogeneity, 537

Sæther, Bernt-Erik. Reproductive strategies in relation to prey size in altricial birds: homage to Charles Elton, 285
Sakaluk, Scott K. See Anne-Katrin Eggert
Schoener, Thomas W. Temporal variability in lizard numbers: what is the appropriate kind of study population? 868
Service, Philip M. See James W. Curtsinger
Sillén-Tullberg, Birgitta. See Jacob Höglund
Slatkin, Montgomery. See Isabelle Olivieri
Smouse, Peter E. See L. Scott Mills
Snow, Allison A. Postpollination selection and male fitness in plants, S69
Sorci, Gabriele, Manuel Massot, and Jean Clobert. Maternal parasite load increases sprint speed and philopatry in female offspring of the common lizard, 153
Stanton, Maureen L. Male-male competition during pollination in plant populations, S40
Stebbins, G. Ledyard. See Gregory J. Anderson

Takahashi, Satoshi, and Michio Hori. Unstable evolutionarily stable strategy

and oscillation: a model of lateral asymmetry in scale-eating cichlids, 1001
TATAR, MARC, and JAMES R. CAREY. Sex mortality differentials in the bean beetle: reframing the question, 165
TAYLOR, CHRISTOPHER M., and NICHOLAS J. GOTELLI. The macroecology of *Cyprinella:* correlates of phylogeny, body size, and geographical range, 549
TER MAAT, A. See J. A. G. M. DE VISSER
THOMPSON, DESMOND B. A. See IAN P. F. OWENS
THOMSON, JAMES D. See KENT E. HOLSINGER
TILL-BOTTRAUD, IRÈNE, D. LAWRENCE VENABLE, ISABELLE DAJOZ, and PIERRE-HENRI GOUYON. Selection on pollen morphology: a game theory model, 395
TILMAN, DAVID. See ROBERT D. HOLT
TRAVISANO, MICHAEL. See FARIDA VASI

VAIL, STEPHEN G. Overcompensation, plant-herbivore mutualism, and mutualistic coevolution: a reply to Mathews, 534
VASI, FARIDA, MICHAEL TRAVISANO, and RICHARD E. LENSKI. Long-term experimental evolution in *Escherichia coli.* II. Changes in life-history traits during adaptation to a seasonal environment, 432
VENABLE, D. LAWRENCE. See IRÈNE TILL-BOTTRAUD
VON SCHANTZ, TORBJÖRN, MATS GRAHN, and GÖRGEN GÖRANSSON. Intersexual selection and reproductive success in the pheasant *Phasianus colchicus,* 510

WANG, GANG. See DA-YONG ZHANG
WESTNEAT, DAVID F. To guard mates or go forage: conflicting demands affect the paternity of male red-winged blackbirds, 343
WHITE, PETER S. See MICHAEL W. PALMER
WILLSON, MARY F. Sexual selection in plants: perspective and overview, S13
WILSON, DAVID SLOAN. See BEREN W. ROBINSON
WILSON, DAVID SLOAN, and JIN YOSHIMURA. On the coexistence of specialists and generalists, 692

YODZIS, PETER. See KEVIN MCCANN
YOSHIMURA, JIN. See DAVID SLOAN WILSON

ZHANG, DA-YONG, and GANG WANG. Evolutionarily stable reproductive strategies in sexual organisms: an integrated approach to life-history evolution and sex allocation, 65
ZONNEVELD, C. See J. A. G. M. DE VISSER

Alphabetical Table of Contents of Titles

Accumulation of deleterious mutations and the evolutionary cost of being a generalist. Tadeusz J. Kawecki, 833
Aggregation and the dynamics of host-parasitoid systems: a discrete-generation model with within-generation redistribution. P. Rohani, H. C. J. Godfray, and M. P. Hassell, 491
Allocation of reproductive effort in perennial plants under pollen limitation. Isabelle Olivieri, Denis Couvet, and Montgomery Slatkin, 373
Antagonistic pleiotropy, reversal of dominance, and genetic polymorphism. James W. Curtsinger, Philip M. Service, and Timothy Prout, 210
Balancing foraging and antipredator demands: an advantage of sociality. Colin W. Clark and Reuven Dukas, 542
Bateman's principles and the measurement of sexual selection in plants and animals. Stevan J. Arnold, S126
The benefits of overcompensation and herbivory: the difference between coping with herbivores and liking them. J. N. A. Mathews, 528

Character release and displacement in fishes: a neglected literature. Beren W. Robinson and David Sloan Wilson, 596
Competition and coexistence: the effects of resource transport and supply

rates. Michael A. Huston and Donald L. DeAngelis, 954
Constraints on reproduction by flying vertebrates: energy and calcium. Robert M. R. Barclay, 1021
Constraints on the evolution of attractive traits: selection in male and female zebra finches. Donald K. Price and Nancy Tyler Burley, 908
The cost of male secondary sexual traits: developmental constraints during ontogeny in a sexually dimorphic water strider. Göran Arnqvist, 119

Defended fortresses or moving targets? another model of inducible defenses inspired by military metaphors. Frederick R. Adler and Richard Karban, 813
Delayed germination of seeds: a look at the effects of adult longevity, the timing of reproduction, and population age/stage structure. Mark Rees, 43
Deleterious mutations and the evolution of male haploidy. David B. Goldstein, 176
Demographic consequences of inbreeding in remnant populations. L. Scott Mills and Peter E. Smouse, 412
Deriving the functional response without assuming homogeneity. G. D. Ruxton and W. S. C. Gurney, 537
Dioecy and gametophytic self-incompatibility: reproductive efficiency revisited. Keith Karoly, 677
Does lekking promote the evolution of male-biased size dimorphism in birds? on the use of comparative approaches. Jacob Höglund and Birgitta Sillén-Tullberg, 881
A dynamic perspective on the physiological cost of reproduction in plants. Tia-Lynn Ashman, 300
The dynamics of Fisherian sex-ratio evolution: theoretical and experimental investigations. Alexandra L. Basolo, 473

The effect of a change in foraging options on intake rate and predation rate. John M. McNamara and Alasdair I. Houston, 978
Energy budgets and reproductive allocation in the simultaneous hermaphrodite pond snail, *Lymnaea stagnalis* (L.): a trade-off between male and female function. J. A. G. M. De Visser, A. Ter Maat, and C. Zonneveld, 861
Energy conservation and the evolution of flightlessness in birds. Brian K. McNab, 628
Erratum. Sexual selection in plants: perspective and overview, 880
Estimating the rate of phenotypic evolution from comparative data. Emília P. Martins, 193
Evolutionarily stable reproductive strategies in sexual organisms: an integrated approach to life-history evolution and sex allocation. Da-Yong Zhang and Gang Wang, 65
Evolutionary and continuous stability in asymmetric games with continuous strategy sets: the parental investment conflict as an example. Uzi Motro, 229
The evolution of phenotypic life-history trade-offs: an experimental study using *Drosophila melanogaster*. Armand M. Leroi, Sung B. Kim, and Michael R. Rose, 661
The evolution of plumage dichromatism in the New World blackbirds: social selection on female brightness? Rebecca E. Irwin, 890
Extraordinary sex roles in the Eurasian dotterel: female mating arenas, female-female competition, and female mate choice. Ian P. F. Owens, Terry Burke, and Desmond B. A. Thompson, 76

Fluctuating asymmetry and variation in the size of courtship food gifts in decorated crickets. Anne-Katrin Eggert and Scott K. Sakaluk, 708

Genetic slippage in response to sex. Michael Lynch and Hong-Wen Deng, 242
The genetics of adaptation: lessons from mimicry. Brian Charlesworth, 839

Habitat persistence and the evolution of wing dimorphism in insects. Derek A. Roff, 772

Intersexual selection and reproductive success in the pheasant *Phasianus colchicus*. Torbjörn von Schantz, Mats Grahn, and Görgen Göransson, 510

Intrademic group selection imposed by a parasitoid-host interaction. David E. McCauley, 1
Is there a unifying concept of sexual selection that applies to both plants and animals? Stevan J. Arnold, S1

Long-term experimental evolution in *Escherichia coli*. II. Changes in life-history traits during adaptation to a seasonal environment. Farida Vasi, Michael Travisano, and Richard E. Lenski, 432

The macroecology of *Cyprinella:* correlates of phylogeny, body size, and geographical range. Christopher M. Taylor and Nicholas J. Gotelli, 549
Male-female conflict and parent-offspring conflict. David C. Queller, S84
Male-male competition during pollination in plant populations. Maureen L. Stanton, S40
Maternal parasite load increases sprint speed and philopatry in female offspring of the common lizard. Gabriele Sorci, Manuel Massot, and Jean Clobert, 153
Models of sexual selection in hermaphrodites, especially plants. Martin T. Morgan, S100

Nonbiological gradients in species richness and a spurious Rapoport effect. Robert K. Colwell and George C. Hurtt, 570
Nonlinear dynamics and population disappearances. Kevin McCann and Peter Yodzis, 873
Nothing transferred, nothing gained: dioecy and gametophytic self-incompatibility continued. Gregory J. Anderson and G. Ledyard Stebbins, 688

On adaptive search and optimal stopping in sequential mate choice. Y. Dombrovsky and N. Perrin, 355
On the coexistence of specialists and generalists. David Sloan Wilson and Jin Yoshimura, 692
Overcompensation, plant-herbivore mutualism, and mutualistic coevolution: a reply to Mathews. Stephen G. Vail, 534

A phylogenetic perspective on teleost gastrulation. Andres Collazo, Jessica A. Bolker, and Ray Keller, 133
Physical stress and positive associations among marsh plants. Mark D. Bertness and Sally D. Hacker, 363
Pivotal assumptions determining the relationship between stability and complexity: an analytical synthesis of the stability-complexity debate. Daniel Haydon, 14
Pollen discounting in *Erythronium grandiflorum:* mass-action estimates from pollen transfer dynamics. Kent E. Holsinger and James D. Thomson, 799
Pollen tube numbers and selective fruit maturation in *Lindera benzoin*. Richard A. Niesenbaum and Brenda B. Casper, 184
Postpollination selection and male fitness in plants. Allison A. Snow, S69

Reproductive strategies in relation to prey size in altricial birds: homage to Charles Elton. Bernt-Erik Sæther, 285
Resource use and the survival of land and freshwater vertebrates on oceanic islands. Brian K. McNab, 643

Scale dependence and the species-area relationship. Michael W. Palmer and Peter S. White, 717
Scale-dependent constraints on food-web structure. Neo D. Martinez, 935
Selection on pollen morphology: a game theory model. Irène Till-Bottraud, D. Lawrence Venable, Isabelle Dajoz, and Pierre-Henri Gouyon, 395
Sex mortality differentials in the bean beetle: reframing the question. Marc Tatar and James R. Carey, 165
Sexual selection and the evolution of allometry for sexual size dimorphism in the water strider, *Aquarius remigis*. Daphne J. Fairbairn and Richard F. Preziosi, 101
Sexual selection and the mismeasure of color. A. T. D. Bennett, I. C. Cuthill, and K. J. Norris, 848
Sexual selection in plants: perspective and overview. Mary F. Willson, S13
Should prey overestimate the risk of predation? Peter A. Abrams, 317
Simple rules for interspecific dominance in systems with exploitative and appar-

ent competition. Robert D. Holt, James Grover, and David Tilman, 741
Simultaneous optimization of egg distribution and sex allocation in a patch-structured population. Cornelis J. Nagelkerke, 262

Temporal variability and geographical patterns in the population density of microtine rodents: a reply to Xia and Boonstra. Ilkka Hanski, Heikki Henttonen, and Lennart Hansson, 329
Temporal variability in lizard numbers: what is the appropriate kind of study population? Thomas W. Schoener, 868
To guard mates or go forage: conflicting demands affect the paternity of male red-winged blackbirds. David F. Westneat, 343

Unstable evolutionarily stable strategy and oscillation: a model of lateral asymmetry in scale-eating cichlids. Satoshi Takahashi and Michio Hori, 1001

Variation in geographical range size among mammals of the Palearctic. Andy J. Letcher and Paul H. Harvey, 30

Within-host population dynamics and the evolution and maintenance of microparasite virulence. Rustom Antia, Bruce R. Levin, and Robert M. May, 457

Alphabetical Table of Keywords
